LANGUAGES

French: Native speaker
English: B2 (90/120 TOEFL)
Italian : A2
Chinese: beginner

PROJECTS

Developed a Convolutional Neural Network (**CNN**) for figurine classification.
Motion capture analysis of tennis players (**MMPose**)
Missing value prediction (Enedis Hackathon)
Study of **Gamma** and **Beta** functions

SKILLS

Computer Skills : Microsoft Office, VSCode, Overleaf, Eclispe
Programming Languages : Python, C, R, Java, OCaml, Assembly, SQL, Ada
AI Libraries (Python) : PyTorch, TensorFlow, scikit-learn
Soft Skills : Patient, Meticulous, Curious

INTERESTS

Tennis : Competitive player
Equestrianism : Competitive show jumping
Reading : Novels, Manhwa
Music : Flute, Accordion

Jérémy CLAUX

1st-Year Student, ENSEEIHT – Digital Sciences (ModIA Track)
Seeking:

- Summer Internship in Artificial Intelligence
- 2-Year Work-Study Program starting September 2027

EDUCATION

Digital Sciences Engineering Program for ModIA – ENSEEIHT (1st year) *2026 - Present*

Double degree in Mathematics and Computer Science - third-year student *2023 - 2026*
University of Toulouse (Paul Sabatier)
Key Courses : Probabilities, Inferential Statistics, Linear Algebra, Analysis, Graph Theory, Databases, Artificial Intelligence

French equivalent of high school diploma with honours *2020 - 2023*
High School Jean-Pierre Vernant (31)
Majors : Mathematics, Physics-Chemistry, and Engineering Sciences
Option : Advanced Mathematics

WORK EXPERIENCE

Research Internship - IRIT (Toulouse Institute of Computer Science Research) *January 2026 – mai 2026 (5 months)*
Modeling temporal planning problems under uncertainty (STNU) using PDDL. Leveraged domain-specific data to predict realistic temporal bounds.

Introductory Internship with AI Engineers – Sopra Steria, Colomiers *June - August 2025 (2 months)*
Gained practical insight into the role of an AI engineer and core artificial intelligence concepts. Implemented decision trees and K-Means clustering algorithms. Developed a reinforcement learning agent using Q-learning. Generated text embeddings with SentenceTransformer and built a semantic search engine using FAISS. Designed and trained a Convolutional Neural Network (CNN) for figurine image classification. Developed a program to compare two versions of the same XML file.

Crew Member – McDonald's, Carbonne *June - August 2024 (2 months)*
